Forecast for Saturday 11 Jun 2022

Weather: Partly cloudy skies providing some misty conditions on the summits through the early hours. Sunny intervals and scattered showers during daylight hours. The showers should mostly be light but the occasional one could be heavy. These showers will then ease off through the evening with some late sunny spells and variable cloud.

Chance of cloud-free hill tops above 800m: 60% during the early hours and evening, otherwise 90%.

Low Cloud and visibility: Occasional patches of cloud on slopes above 500m during the early hours and again mid-evening onwards, bringing hill fog at times. Otherwise cloud largely clear of the summits, but briefly lowering to around 800m in any showers. Visibility beneath cloud generally excellent, with only brief deteriorations to moderate in any showers.

Meteorologist's View
Winds will be strong on the slopes. Be sure to have appropriate footwear to help keep your footing and ensure all personal items are safely secured.

Forecast for Sunday 12 Jun 2022
Weather: Patchy cloud bringing mist and hill fog to the summits during the early morning. A largely fine day thereafter with sunny spells. Remaining mostly dry, though an isolated light shower is possible.

Maximum wind: 20mph westerly winds on the summits, gusting 30mph at times.

Chance of cloud-free hill tops above 800m: 60% in the early morning, increasing to 90% thereafter.

Low Cloud and visibility: Cloud at 500m and above covering higher routes on occasion through the first part of the morning. From then on, cloud largely above the summits with very good visibility of surrounding areas.

Temperature: **Valleys:** Plus 10 Celsius to plus 18 Celsius.
At 800m: Plus 4 Celsius, rising to plus 7 Celsius.
Freezing level: Above the summits.
